

“Where Learning is Child’s Play”

Join us for Preschool Open House! Saturday, January 26th 9:00-12:00pm

Full S.T.E.A.M. Ahead! Join the excitement as we create and explore in activities designed to awaken curiosity and facilitate discovery of the world around us. Our hands-on, child-centered activities foster curiosity, stimulate creativity and promote a strong love of learning. Weekly museum lessons enrich our curriculum. While focusing on each child’s needs and stage of development using the CT Early Learning and Development Standards, we facilitate the ability to express oneself, scientific understanding, mathematics and literacy skills. While learning academic skills are important, preschool children are also developing social skills that will last a lifetime. Put it all together and what do you get? An amazing opportunity for your child to shine in a safe and nurturing environment.

***Family Museum Membership included!**
