Preschool Perk: All The Wonder of The Children's Museum

WEST HARTFORD, Conn (April 4, 2012) – What better early childhood learning experience than a preschool that features weekly live animal demonstrations, physical science lessons, planetarium shows, and museum exhibits?

The Children's Museum Preschool program, one of the first early childhood education centers in the United States, provides classes for children age 3, 4, and 5 and a curriculum that channels and challenges the child as an individual.

A typical school day includes activities that enhance social, emotional, intellectual and physical growth. Experienced teachers encourage children to explore, imagine and create in a small class size setting, fostering an appreciation of science and nature.

"We offer an incredibly unique program and priceless learning opportunities for our students," said Joyce Cowles, Director of The Children's Museum Preschool. "Children can meet a chinchilla or a blue-tongued skink, fly through space in a cardboard rocket, or make their own cloud."

The Children's Museum Preschool is now registering for the 2012-2013 school year. Enrollment includes weekly lessons and a one-year membership to The Children's Museum. The preschool is now also registering for half-day summer sessions. One of the more popular weeks is "Pirates and Princesses".

Call The Children's Museum at 860-523-7449 for information or to schedule a tour of the school.

The Children's Museum features over 100 live animals, including the now famous Fennec foxes, hands-on science exhibits, out-of-this-world digital planetarium shows, and programs for younger children and families. The Children's Museum and Roaring Brook Nature Center are the region's premiere destinations for science and nature exploration.

The Children's Museum is located at 950 Trout Brook Drive in West Hartford and at Roaring Brook Nature Center in Canton. More information is available at www.TheChildrensMuseumCT.org.
